## EDUCATION

Indian Institute of Technology, Mandi  
B.Tech in Computer Science and Engineering  
CGPA: 9.7/10  
Relevant Coursework: Data Structures & Algorithms, Design of Algorithms, DBMS, Formal Languages & Automata Theory, Computer Organization, Probability, Machine Learning, Deep Learning

Himachal Pradesh, India  
August 2024 – Present

## TECHNICAL SKILLS

**Languages:** Python, C, C++, SQL, Bash  
**Frameworks:** React.js, Express.js, FastAPI, PyTorch, Scikit-Learn  
**Tools:** Linux, Git, Docker, Postman, VS Code, Nginx, Vim  
**Concepts:** Data Structures, Database Systems, Object-Oriented Programming, Shell Scripting, UNIX Processes, ML/DL

## PROJECTS

Aayojan – Wedding CRM & Operations Platform

GitHub | Live

June 2026

- Developed and deployed a production-ready full-stack CRM comprising 40+ REST APIs, enabling role-based management of leads, weddings, vendors, budgets, documents, and workflows across 4 user roles.
- Implemented JWT authentication, AI-powered assistance, automated email/SMS reminders, drag-and-drop Kanban workflows, and scheduled background jobs to streamline end-to-end event operations.

Nostalgic Fever – Time-Locked Memory Capsule Platform

GitHub | Youtube

January 2025

- Engineered a full-stack social platform enabling users to securely create and unlock digital memory capsules after a specified time, with low-latency real-time messaging using WebSockets.
- Built blockchain-backed image verification using Ethereum Sepolia smart contracts for immutable proof of ownership, and integrated ML-based sentiment analysis to personalize user interactions.

fakeNET – Forensic Explainability of Deepfake Detection, Research Project

GitHub

April 2025

- Designed a lightweight and explainable deepfake detection and localization model (2.13M parameters).
- Achieved 96.79% accuracy and 96.78% F1, outperforming all compared methods including SIDA (93.6% accuracy, 13B)
- Ranked 2nd among evaluated open-source detectors on AIGI-Now benchmarks with 84.53% pixel-balanced accuracy

## EXPERIENCE

Founder – [theTwoCubes](#)

October 2024 – Present

- Founded and lead a software consulting firm, delivering 2,500 USD worth of software solutions while managing end-to-end product development, deployment, and client communication.
- Delivered a computer vision system for [adVoice Inc.](#) that automatically detects optimal logo placement regions on garments and overlays logos using YOLOv11 and openCV; currently in production for large-scale image processing.
- Delivered a back-office automation platform integrating outlook email processing, otp relay workflows, odoo ERP, and LAN communication, significantly reducing manual intervention and streamlining operations, currently deployed in production.

Inter IIT Tech Meet 14.0 – Algorithmic Trading Problem Statement, Ebullient Securities

December 2025

- Developed a modular Python pipeline for preprocessing, feature engineering, model training, and large-scale backtesting on 1-second financial tick data spanning one year.
- Designed a regime-aware gated LSTM with attention, achieving 26.16% annualized returns, calmar ratio of 20.60, and -1.27% maximum drawdown.

## ACHIEVEMENTS

- Achieved rating of 1360 on Codeforces - Solved 750+ algorithmic and competitive programming problems.
- Won 1st place among 100+ teams at KrackHack'25 Hackathon, GDG IIT Mandi
- Won 1st place in RL Track and 3rd place overall among 50+ teams at HCLTech'26 Hackathon.
- Secured 2nd position among 150+ teams at Orion Astrathon (ML Hackathon), IIT Mandi
- Secured 2nd position among 80+ teams at ML Space Code Competition, IIT Mandi

## LEADERSHIP & ACTIVITIES

- Academic Sub-Counselor, Computer Science Batch 2024
- ML Developer, Google Developers Group, IIT Mandi - Organized KrackHack 2026 for 800+ participants, leading the ML track, problem design, sponsorship coordination, and community engagement.
- Upcoming Co-coordinator, ACM, IIT Mandi - Organized competitive programming contests, created and validated problem sets.
